

MANITOU SPRINGS SCHOOL DISTRICT 14

GO MUSTANGS!

MANITOU SPRINGS ELEMENTARY SCHOOL • UTE PASS ELEMENTARY SCHOOL • MANITOU SPRINGS MIDDLE SCHOOL • MANITOU SPRINGS HIGH SCHOOL

The science of Fountain Creek

Manitou Springs Elementary students in Ms. Mussi's fifth grade science class walked down to Fountain Creek for a first-hand view of the water cycle present in their community. Students observed, drew and recorded

sounds from the creek. They ended the lesson with "stick races" to gauge the speed of the current and how choice of stick shape, part of the creek where the stick was thrown and current were

all variables to consider when making a decision about which stick to throw. Students will continue their lessons about water in the hydrosphere and how that connects with the atmosphere.

MSMS band and physical education classes enjoying the great outdoors

Middle School teachers and students took advantage of the beautiful Colorado weather to hold socially distanced outdoor classes!

Donations lead to picnic tables for middle school

Thanks to generous donations, MSMS now has multiple outdoor picnic tables for lunch and outdoor classes. Thanks to our community and donors for making this space possible for our students!
